State of Delaware "Requirements" for BRS software

1. Option for Sort on any or all the data. e.g. (a) How much waste is generated for each SIC code?
(b) Sort on waste code, which are included in PBT list.
2. Option to convert the total quantity in annual report to tons or as reported in the report (which could be gallons or density/lb.).
3. Archive option for past data. Have option to transfer the past data to other storage media.
4. In report menu - Run report for a particular generator across a year.
5. Supply the disk to all the generators and eliminate the data entry for BRS. Easy upload of electronics files (i.e. on floppy disks) from generator.
6. Program should automatically do edit check.
7. The program should not accept invalid code used on report.
8. When EPA ID is typed in, the relevant information (e.g. name, address) regarding Generator/Transporter and TSD should show up on the screen. There should be an option to change this information in another part of the program.
9. The data entry screen should look exactly the same as the report form.
10. The program should have the capability to export the data to word processing, spread sheet or GIS programs.
11. Print the reports.
12. Utilize the program every year and have technical support for at least five days in a week.
13. Security - Every one can run report but only one person can enter the data.
14. Reasonable maintenance/upgrade price.
15. Reasonable cost to purchase this software. The state does not have to pay a lot to buy this software.
16. Windows 98 compatibility.
17. Option to save the data files on Network drive or Zip drive.
18. Need to get an estimate if installed on the network.
